

Mayur Humbre

Frontend Developer

Kalyan, Maharashtra | mayurhumbre06@gmail.com | 8452 036 869 | [GitHub](#) | [LinkedIn](#)

About

Frontend developer focused on building responsive and interactive web applications using React.js, JavaScript, Vite, and Tailwind CSS.

Experienced in building frontend projects involving CRUD operations, reusable components, local storage management, responsive layouts, and React state handling. Currently improving frontend architecture, API integration, and scalable application development skills through hands-on projects and continuous learning.

Projects

GitHub User Search App | React.js, Tailwind CSS, Vite

- Built a responsive GitHub profile search application using React and GitHub API
- Implemented dynamic search functionality and conditional rendering
- Designed responsive UI using Tailwind CSS
- Implemented component-based architecture and React state management

Todo Application | React.js, JavaScript

- Built CRUD-based Todo application with add, edit, delete, and toggle task functionality
- Implemented local storage persistence using lazy state initialization
- Created reusable components and responsive layouts
- Implemented React Hooks and state management concepts

Skills

Responsive Web Design • Component-Based Architecture • State Management • Reusable Components • CRUD Operations • Conditional Rendering • UI Development • Problem Solving • Debugging • Version Control

Tools & Technologies

React.js • JavaScript (ES6+) • HTML5 • CSS3 • Tailwind CSS • Vite • Git • GitHub • Vercel
